English Abstract

The present invention is directed to an e-commerce outsourcing system and method that provides hosts (105d-f) with transparent, context sensitive e-commerce supported pages over the Internet (110). The look and feel of a target host (105f) is captured for future use (135a-d). The look and feel is captured by receiving the identification of an example page on the target host (105f), retrieving the page (120a-c), identifying the look and feel elements of the identified page (125a-d) and storing the identified elements (135a-d). The host (105f) is provided with links correlating the host with a link for inclusion within a page on the host website for serving to a visitor computer (105a-c), wherein the provided link correlates the host website with a selected commerce object contextually related to

material in the page. The commerce object can be a product, a product category or a dynamic selection indicator. Upon activation of the product link, the visitor computer (105a-c) is served with an e-commerce support page.

French Abstract

L'invention concerne un systeme et un procede d'importation concus pour le commerce electronique permettant de doter des sites hotes (105d-f) de pages supports de commerce electronique sensibles au contexte et transparentes sur Internet (110). On saisit la richesse fonctionnelle d'un site hote voulu (105f) en vue d'une utilisation ulterieure (135a-d). On effectue cette saisie en recevant l'identification d'une page exemple sur le site hote voulu (105f), en extrayant la page (120a-c), en identifiant les elements de la richesse fonctionnelle de la page identifiee (125a-b) et en stockant les elements identifies (135a-d). Le site hote (105f) presente des liaisons permettant d'etablir une correlation entre le site hote et un lien a introduire dans une page sur le site Web hote en vue de desservir un ordinateur visiteur (105-c). Ledit lien etablit une correlation entre le site Web hote et un objet de commerce selectionne, contextuellement relatif aux elements de la page. L'objet de commerce peut etre un produit, une categorie de produits ou un indicateur de selection dynamique. Suite a l'activation du lien produit, l'ordinateur visiteur (105a-c) recoit une page support de commerce electronique.
